October 2023

To whom it may concern,

We, the fourth-year Bachelor of Science in Information Technology students from Batangas State University – TNEU – ARASOF – Nasugbu are currently taking the IT Capstone Project II course. One of the requirements of the course is to develop a system which would be beneficial to an organization or community. Currently, we are in the process of developing Vehicle Accident Detection Device for road awareness and safety in our municipality.

Our system project is entitled “VADD: Vehicle Accident Detection Device with Integration of IoT and Web System”. In view hereof, we are asking for your kind assistance to test our developed system. Your feedback and insights will play a pivotal role in helping us refine the system. In addition, we would like to request your permission to be one of the external stakeholders/users of our system.

Thank you very much and God bless.

Respectfully yours,

CAHAYON, JAKE ANGELO D.

MAHINAY, SHANNE MAE A.

MARASIGAN, CARL JORIZ MICKEAL S.

NOVERO, ANGELO MITCHEL D.

Student Researchers
